1. **Do the chosen tables in the accountability structure make sense for the Stamford?**

Table	Yes/No Comments	Table	Yes/No Comments
Executive Team (ET)	• *"Access to resources" does not resonate* • *Community involvement should be included* • *Perhaps one core leader from each outcome chosen* *Should include the following:* • *Superintendent* • *Mayor* • *Business Council of FF county* • *CEO of hospital* • *BOE Chair* • *UCONN President* • *UW CEO* • *Representative from Human Services* • *Key grassroots leaders*	**Collaborative Action Network (CAN)**	• *Make sure we are clear on exactly what authority they will have & what the ET can do*
Operations Team/ Implementation Team	• *Need arrows of responsibility*	**Data /Research Network**	• *More clarity on how data will be used & shared so others aren't weary to share it*
Core Leadership Table (LT)	• *Not clear what the difference is between Leadership Table, the Executive Team and Operations*	**Funders Network**	• *Funds follow the process, they do not drive the process*
Back bone entity and the management team	• *No because not defined enough and potential for conflict* • *Who does the backbone respond to?* • *Should merge with Operations Team*	**Other**	• *All table line items are necessary, but consider combining & categorizing in a simple, digestible format.* • *Facilitators should be a neutral third party and should be @ decision making meetings* • *Where is the YOUTH?*
Community at large	• *The community needs to be more central in the graphic*	**Other**	

2. **Did the design resonate with all of you? Yes/No *If No, please explain:***

X1   X1

- *Yes, but the community/youth needs to be at the center to inform the process.*
- *No, there is too much information and layers within model.*
- *A simple more effective diagram (similar to DC's model) with a micro, meso, & macro levels is preferred; perhaps a social-work/social justice model*
- *Design is confusing.*
- *We need a design that shows who reports to who for the sake of clarity.*
- *Community shouldn't be on the outside, they should be at the center and arrows currently don't connect back to community.*
- *Why is Equity in the circle, shouldn't it be embedded throughout? What does equity mean for Stamford? Lots of politics around it therefore, we need a broader understanding for this alliance.*

3. **Pick one of the identified tables and revisit B/ART particularly discuss what the Task may look like:**

Table	Authority	Role and/or Responsibility	Task
Executive Team	*Decision making*		• *Approves policy & strategy* • *Promotes/supports funding efforts and approves budget*
Operations Team/ Implementation Team	*Reporting & advising upstream & directly downstream*		• *Implements project plan* • *Makes policy recommendations* • *Meets monthly* • *Reviews goals set by CANS* • *Resolves low level issues* • *Maintains quality control* • *Guides day to day operations & decisions* • *Collaborates with staff*
Community at large	*Givers & Receivers* *Advisory/ Advocacy*	*Community Engagement*	• *Identifies community needs* • *Recruits broader community* • *Communicates back to community* • *Implements "Trust" activities to connect with one another to verify data collected & share resources as well as identifying untapped resources (both within "givers" system & "receivers "as human potential & human resources)*
Back bone entity and the management team			• *Provides fund raising support* • *Publications* • *Manages project progress* • *Oversees annual report card*

StriveTogether
Every child. Cradle to career.

Table	Authority	Role and/or Responsibility	Task
Funders Network			• *Raises funds* • *Researches opportunities* • *Grant writing*
Collaborative Action Network (CAN)			• *Advises CAN members & Executive Team on indicators* • *Determines data sharing agreements & schedules* • *Each CAN will have specific tasks*
Data /Research Network			• *Collects & decides what data is important to share; analyzes & disaggregates* • *Creates list of requirements for making decision like reliability etc.* • *Shares with all stakeholders & develops a mechanism to provide feedback to ensure utility* • *Meets with CANs to explain & debrief* • *Creates data sharing agreements* • *Brings concerns & bright spots to Executive Team* • *Identifies gaps in data & where/how they can be filled* • *Creates a community of access & transparency that is not identifiable*
